Victor Eronmosele

linkedin.com/in/victor-eronmosele   github.com/victoreronmosele

I am a **Senior Flutter Developer** especially experienced in building great **mobile apps** and **developer tools**.

Technologies and Languages

- **Languages:** Dart, Kotlin, Swift, Go, TypeScript, JavaScript
- **Frameworks:** Flutter, Jetpack Compose, Swift UI, React, Next JS

Open Source and Volunteer Work

- **StackOverflow Contribution**: Answered **360 questions** on Flutter, JavaScript, Firebase and testing earning **7980 points.** Profile link.
- **Contributions To The Flutter Project**: I've made code contributions to the Flutter SDK and the Flutter Devtools.

Projects

- web_color_picker: **Flutter library** that provides the **browser's color picker** as a customizable Flutter widget. Technologies used: Dart, Flutter, JavaScript.
- Flutter Gradient Generator: Online **gradient generator** that provides Flutter code. Technologies used: Flutter, Dart, Firebase Hosting, Firebase Analytics
- Youtube Channel creating technical explainers and showcasing personal projects.
- Victor Eronmosele's Blog: Writing about Flutter, testing and Firebase. A popular article is a piece on Mocking and Testing Shared Preferences in Flutter Unit Tests.

Work Experience

SDK Support Engineer   **Kinde Auth SDK**   **2025**
Remote | Freelance   Australia

- Maintaining Kinde's **Flutter** SDK for authentication and billing.
- Contributing to Kinde's other mobile SDKs: **iOS**, **Android** and **React Native**.
- Adding new features to the SDKs maintaining good API design and security.
- Resolving issues for customers regarding SDK setup and usage.
- Improving the SDK developer experience by properly documenting features and setting up starter kits.

Fullstack/Mobile Engineer   **MyBingoCard**   **2025**
Remote | Freelance   US

- Developed a social gaming app using **Flutter**.
- Responsible for project architecture, UI implementation and app store deployment.
- Implemented backend features using **Node JS**, **Express** and **Firebase**.

Senior Flutter Engineer   **Truely**   **2024**
Remote | Contract   Singapore

- Developed a **Flutter** mobile app enabling users to purchase and activate eSIMs.
- Created automated CI/CD scripts for deployment to the PlayStore and AppStore
- Addressed tester feedback and resolved bugs.

Senior Flutter Engineer   [Make](#)   **2023**
Remote | Contract   US

- Worked on the Bill of Rights Institute mobile application using **Flutter**, optimizing its performance and user experience.
- Customized the web view version of the website through development of UIs and logic, resulting in improved functionality and visual appeal.
- Successfully implemented a download feature for assignments as web archives, enabling convenient offline access and enhancing student engagement.

Senior Flutter Engineer   [FCMB UK](#)   **2021 - 2023**
Remote | Full-time   UK

- Fixed bugs to improved the overall **Flutter** application's business logic
- Wrote Unit Tests and Widget Tests to verify the applications' workflows and to guarantee the delivery of high-quality code.
- Refactored the application UI to be more optimized for low-end and earlier Android /iOS devices.

Google Cloud Platform Expert   [Directly](#)   **2021**
Remote | Contract   US

- Provided 213 well-researched and quality answers on **Firebase** and **Flutter** on StackOverflow
- Debugged developers' issues with **Flutter** and **Firebase** and provided support until issues were completely resolved

Flutter Developer   [ActivEdge Technologies](#)   **2019 - 2021**
In-person | Full-time   Nigeria

- Led a team to build a B2B app and a B2C finance app for **Android** and **iOS** using **Flutter**.
- Maintained code quality by writing tests and performing code reviews.

Education and Certifications

- **B.Eng. Petroleum Engineering,** Federal University of Petroleum Resource, Effurun, Nigeria   **2011–2016**
